Fusion Pianoharp by kpr

Sample Library and Program Presets Bank for Alesis Fusion 8HD/6HD.

The Pianoharp is a kind of Zither and Harp where the strings are hitted by a mechanical hammer action. It's old and rare too. Strings are organized to play chords and single notes in the sections.

- 35 Program Presets: Single instruments based on the Fusion's sampleplayer synthesis. Sophisticated Controller programming for Control Knobs 1-4, S1 and S2 switches, Trigger Buttons T1-T4, Modulation Wheel, Pitch Bend.

General Controller and FX Assignment

Use following Controllers for volume expression, tone color variations, transpose effects, envelope shaping, oscillator tuning, instruments parameter adjustment, sound crossfade blend, effect intensity, pitch bend effects and more:

Pitch Bend Wheel
Modulation Wheel
Knob 1
Knob 2
Knob 3
Knob 4
T1 Trigger Button
T2 Trigger Button
T3 Trigger Button
T4 Trigger Button
S1 Switch
S2 Switch

In all cases the Controller Assignments are setted as category standard to allow the same handling for each sound of this Program Presets bank.

Data handling

To load the Presets data to the Fusion: Unzip the attached data. Create a folder for the soundbank on your computer desktop with the name "Pianoharp 2", etc., drop the unzipped Program data into the folder and move it to the Fusion via USB or CF Card. Use the PDF docs for Presets archive purposes and consult the Fusion owner's manual for references concerning data handling.
