VST Virtual Instruments - Sample Libraries - Moviesound Design - Synthesizer Voicing

## Alesis Fusion OTHERWORLD Presets by kpr

Program Presets Bank for Alesis Fusion 8HD/6HD.

This is the perfect sound collection for all friends of the fantastic synthesizer power of the Fusion. Created by using the internal VA and FM features plus very experimental sounddesign with the internal samples.

This time the Fusion's synth features are explored in a really unusual and creative way using the full potential of the Modulation Matrix with shaping parameters like Filter and LFOs and also the Arpeggiator. The results are definitely "other world". Atmospheres wild and aggressive as well as calm and peaceful, evolving and pulsating droners, superfat layers and rhythmic synth effects, unheard FM percussives and bells and totally scary special sound effects. Perfect for all kinds of music as special ambience, sound effects, weird tone colors, movie soundtracks and scenics atmospheres. With full Controller programming these Programs are really versatile too and each Program is producing a large number of different sounds too!

- 304 Program Presets: Layers and single instruments. Sophisticated Controller programming for Control Knobs 1-4, Modulation Wheel, Aftertouch, Pitch Bend.

## General Controller and FX Assignment

Use following Controllers for tone color variations, transpose effects, envelope shaping, oscillator tuning, instruments parameter adjustment, sound crossfade blend, effect intensity, pitch bend effects and more:

Pitch Bend Wheel  
Modulation Wheel  
Knob 1  
Knob 2  
Knob 3  
Knob 4  
Aftertouch (not all Presets)

## Data handling

To load the Presets data to the Fusion: Unzip the attached data. Create a folder for each soundbank on your computer desktop with the names "kpr SFX 1" etc., drop the unzipped Program data into the folder and move them to the Fusion via USB or CF Card. Use the PDF docs for Presets archive purposes and consult the Fusion owner's manual for references concerning data handling.
