Rare and unusual instruments, that is the straight direction of this amazing sample library. Unique timbres, strange sounds, character, weirdness, scary, liquid, rough, haunting, charming.

Over 190 sample instruments and one-shots provided with 198 ready-to-use Program Presets.

General Controller and FX Assignment

Each one of the 198 Program Preset provides the sound with smart Controller assignment.

Most important is the Ribbon where the Brilliance of a timbre is always under your instant control. The default middle position is the average setting and a slide to the right is giving more treble to the sound, to the left less brilliance.

Moving the Joystick down allows to shorten the decay, up adds vibrato to the sound. SW1 transposes one octave down while SW2 locks the currently selected Ribbon position.

Default Program Preset banks: location User-GG and User-FF
