Creamware Minimax ASB Classics Presets

Program Presets Bank for Creamware Minimax ASB Synthesizer

60 new Presets for quick access: Typical Lead Synth, Pad, Synth Bass, Percussives and Special Effects sounds, that is what the original Minimoog is famous for since decades. All Presets are based on the "Minimoog Classics Patch Charts" by Klaus P. Rausch. For details see listing below.

During sound production, an original Minimoog was used standing to the side to create sounds for the Creamware Minimax ASB to ensure the typical and very similar character.

Mail data attachment product. Perfect for all stage and studio purposes, ready-to-use and produce.

Data handling

Use the Creamware Minimax ASB soundmanager software to load the soundbank.

Program Soundbank

000 BriteBass	Bass
001 PlitshBass	Bass

058 WishYou	Lead
059 EvolutionPad	Pad
060 StrongLead	Lead

Note: All monophonic, except Preset 003, 006, 025.

Tip: The creator of these sounds has also published the Minimoog Classics Patch Book. It contains over 100 patch charts that can also be used for the Creamware Minimax ASB. 60 of these were used as templates for this sound bank. The patch charts allow you to view the parameters, controls, and switch settings. In addition, further modification tips for all sounds are noted on the patch charts. An audio file with the original Minimoog sounds is also included. Therefore most of the sounds are also provided as these audio files, allowing you to compare the original Minimoog sounds directly with the Creamware Minimax ASB preset replicas.
